

Jeffrey Lambert
Director of IT Operations

As BlueTie's Director of IT Operations, Jeffrey Lambert is responsible for the Systems and Network Administration groups at BlueTie, as well as managing BlueTie's corporate IT computing infrastructure including the build out, maintenance and operations of BlueTie's data centers. The Systems and Network Administration groups are responsible for maintaining all of BlueTie's IT environments as well as improving the performance, scalability and reliability of BlueTie's suite of collaboration applications.

Mr. Lambert joined BlueTie as its first employee in March 1999 after working with Mr. Koretz at his previous company, Network Marketing International. Mr. Lambert holds a Bachelors Degree in Information Technology with concentrations in Network and Systems Administration from the Rochester Institute of Technology.
